### Notes

Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

Known only from the type locality in Santa Barbara from 1886; presumed extirpated from wetland modification and

urbanization. Changed to CRPR 1B in 2011, when thought to have been rediscovered in Chino, but rediscovered plant was described as a new taxon, *C. felix* in 2013. Possibly a synonym of *C. sepium* ssp. *limnophila*. Native status in CA uncertain. See *Bulletin of the California Academy of Sciences* 2:417 (1887) for original description, *Annals of the Missouri Botanical Garden* 52(2): 219 (1965) for taxonomic treatment, and *Phytokeys* 32:1-26 (2013) for revised circumscription.
