**Notes**

Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

**General Notes**

Known from fewer than 20 occurrences. Seriously threatened by coastal development, trampling, hybridization with *L. chamissonis*, and non-native plants; properly timed grazing may be beneficial. Possibly threatened by seed predation. Includes *L. tidestromii* var. *layneae*. Only MNT Co. plants are state-listed Endangered as var. *tidestromii*. See *Erythea* 3:17 (1895) for original description.
