### Classification

|                      |                                                                                                              |
|----------------------|--------------------------------------------------------------------------------------------------------------|
| Scientific Name      | <i>Arctostaphylos crustacea</i> Eastw. ssp. <i>subcordata</i> (Eastw.) V.T. Parker, M.C. Vasey & J.E. Keeley |
| Common Name          | Santa Cruz Island manzanita                                                                                  |
| Family               | Ericaceae                                                                                                    |
| Element Code         | PDERI041H7                                                                                                   |
| USDA Plants Symbol   |                                                                                                              |
| Synonyms/Other Names | <u><i>Arctostaphylos tomentosa</i> ssp. <i>subcordata</i></u>                                                |

### Conservation Status

|                            |            |
|----------------------------|------------|
| California Rare Plant Rank | 4.2        |
| Global Rank                | G4T3       |
| State Rank                 | S3         |
| CESA                       | None       |
| FESA                       | None       |
| Other Status               | SB_UCSC    |
| CRPR Changes               |            |
| Date Added                 | 1974-01-01 |
| Last Update                | 2022-02-01 |

### Ecology and Life History

|                      |                                          |
|----------------------|------------------------------------------|
| Lifeform             | perennial evergreen shrub                |
| Blooming Period      | Jan-Apr                                  |
| Elevation m (ft)     | 100-730 (330-2395)                       |
| General Habitats     | Chaparral, Closed-cone coniferous forest |
| Microhabitat Details |                                          |
| Microhabitat         | Rocky                                    |

## Threat List Data from the CNDDDB

|                         |           |             |
|-------------------------|-----------|-------------|
| Threat List Total:      |           | 0           |
|                         | Total EOs | Percent EOs |
| EOs with Threats Listed | 0         | 0%          |
| Threat List:            |           |             |

## Element Occurrence Data from the CNDDDB

|                            |   |
|----------------------------|---|
| Total Element Occurrences: | 0 |
| Element Occurrence Ranks:  |   |
| Excellent (A)              | 0 |
| Good (B)                   | 0 |
| Fair (C)                   | 0 |
| Poor (D)                   | 0 |
| None (X)                   | 0 |
| Unknown (U)                | 0 |
| Occurrence Status          |   |
| Historical, > 20 years     | 0 |
| Recent, < 20 years         | 0 |
| Presence                   |   |
| Presumed Extant            | 0 |
| Possibly Extirpated        | 0 |
| Presumed Extirpated        | 0 |

## Location

|                    |     |
|--------------------|-----|
| California Endemic | Yes |
|--------------------|-----|

### Counties

|                                        |
|----------------------------------------|
| Los Angeles (LAX), Santa Barbara (SBA) |
|----------------------------------------|

### States

|                 |
|-----------------|
| California (CA) |
|-----------------|

### Quads

|                                                                                                                                                                                                                                                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Santa Catalina North (3311844), Santa Catalina West (3311845), Santa Cruz Island A (3311987), Santa Cruz Island B (3311986), Santa Cruz Island C (3311985), Santa Cruz Island D (3311984), Santa Rosa Island North (3312081), Tranquillon Mtn. (3412055) |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### **Notes**

Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

Does plant occur in SLO Co.? Possibly threatened by feral herbivores. See *Leaflets of Western Botany* 1:61 (1933) for original description, and *Madroño* 19(6):198 (1968) for revised nomenclature.
