* Presumed extirpated

(* Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

How common is this taxon in OR? Plants from Plumas NF are not morphologically or genetically distinct from *V. membranaceum*. Plants from Klamath Ranges (SIS Co.) have lighter-colored berries than *V. membranaceum* and may be genetically distinct; needs further study. A synonym of *V. membranaceum* in *TJM* (1993) and *TJM* 2. See *Proceedings of the Biological Society of Washington* 31:75-78 (1918) for original description.
