Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Move to CRPR 1B or 4? Many herbarium specimens of *H. intercedens* are possible misidentifications of *H. depressum*; need annotations. Many mainland occurrences are in decline or possibly extirpated; need field surveys. Threatened by development, habitat loss, road construction, and non-native plants. Previously confused with *H. pusillum*. Similar to *H. depressum*; the two may hybridize in RIV Co. See *Acta Inst. Bot. Acad. Sci. U.R.S.S. Ser. 1, Fasc. 5:222* (1941) for original description and *Nordic Journal of Botany* 2:307-321 (1982) for taxonomic treatment.
