Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Known only from the high Sierra Nevada; field surveys needed. Occurrences from Kern Plateau are threatened by trampling and grazing. Previously Considered But Rejected as being a synonym of *E. spergulinum*, a common taxon; many collections of *E. spergulinum* from FRE Co. need to be examined to confirm their varietal identification. See *Leaflets of Western Botany* 3(9):201-202 (1943) for original description, and 6(4):75-80 (1950) for taxonomic treatment.
