Notes

Definitions of codes preceding a county and/or quad:
* Presumed extirpated
(*) Possibly extirpated
Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.
Previously on List 4.2. Occurrences from MON and SLO counties may be misidentified. Many collections old; need field surveys. Threatened by development. Possibly threatened by non-native plants. Characters distinguishing the varieties of *P. ramosissima* do not work most of the time; needs further study. A synonym of *P. ramosissima* in *TJM 2.*
