

## Report for *Dudleya virens* ssp. *hassei*

### TAXON DETAILS

#### Classification

|                      |   |
|----------------------|---|
| Scientific Name      | <i>Dudleya virens</i> (Rose) Moran ssp. <i>hassei</i><br>(Rose) Moran |
| Common Name          | Catalina Island dudleya   |
| Family               | Crassulaceae  |
| Element Code         | PDCRA040S1  |
| USDA Plants Symbol   | <u>DUVIH</u>  |
| Synonyms/Other Names |   |

#### Conservation Status

|                            |                             |
|----------------------------|-----------------------------|
| California Rare Plant Rank | 1B.2                        |
| Global Rank                | G3?T2                       |
| State Rank                 | S2                          |
| CESA                       | None                        |
| FESA                       | None                        |
| Other Status               | SB_CalBG/RSABG              |
| CRPR Changes               | added to 1B.2 on 2011-03-08 |
| Date Added                 | 2011-03-08                  |
| Last Update                | 2021-12-09                  |

#### Ecology and Life History

|                      |                                    |
|----------------------|------------------------------------|
| Lifeform             | perennial herb                     |
| Blooming Period      | Mar-Jun                            |
| Elevation m (ft)     | 0-400 (0-1310)                     |
| General Habitats     | Coastal bluff scrub, Coastal scrub |
| Microhabitat Details |                                    |
| Microhabitat         | Rocky                              |

## Threat List Data from the CNDDDB

|                                |                  |                    |
|--------------------------------|------------------|--------------------|
| <b>Threat List Total:</b>      |                  | 0                  |
|                                | <b>Total EOs</b> | <b>Percent EOs</b> |
| <b>EOs with Threats Listed</b> | <b>0</b>         | <b>%</b>           |
| <b>Threat List:</b>            |                  |                    |

## Element Occurrence Data from the CNDDDB

|                                   |    |
|-----------------------------------|----|
| <b>Total Element Occurrences:</b> | 10 |
| <b>Element Occurrence Ranks:</b>  |    |
| Excellent (A)                     | 0  |
| Good (B)                          | 0  |
| Fair (C)                          | 0  |
| Poor (D)                          | 0  |
| None (X)                          | 0  |
| Unknown (U)                       | 10 |
| <b>Occurrence Status</b>          |    |
| Historical, > 20 years            | 8  |
| Recent, < 20 years                | 2  |
| <b>Presence</b>                   |    |
| Presumed Extant                   | 10 |
| Possibly Extirpated               | 0  |
| Presumed Extirpated               | 0  |

## Location

---

**California Endemic** Yes

---

### **Counties**

---

Los Angeles (LAX)

---

### **States**

---

California (CA)

---

### **Quads**

---

Santa Catalina East (3311833), Santa Catalina North (3311844), Santa Catalina South (3311834), Santa Catalina West (3311845)

---

### **Notes**

Definitions of codes preceding a county and/or quad:

\* Presumed extirpated

(\* ) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## Notes

Threatened by development and habitat fragmentation. Possibly threatened by feral herbivores. Suspected to hybridize with *D. virens* ssp. *insularis*. See *D. hassei* in *TJM* (1993). See *Bulletin of the New York Botanical Garden* 3(9):35 (1903) for original description, and *Haseltonia* 3:2 (1995) for revised nomenclature.
