Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Known only from the Diablo Range. Many occurrences historical; need field surveys. Possibly threatened by development and non-native plants. Formerly included within *L. dichotoma*, but genetic data show that *L. diabolensis* is actually more closely related to *L. ramosissima*. See *Madroño* 60(3):249-254 (2013) for original description.
