Notes

Definitions of codes preceding a county and/or quad:
- * Presumed extirpated
  - () Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

General Notes

Occurrences are few and possibly local, but widely distributed; needs field surveys. Includes plants previously identified as E. vialis; a former CRPR 1B.2 plant that is endemic to, and state-listed as Threatened, in OR. Difficult to differentiate from E. tomentellus; needs further study. See *Pittonia* 2(7B): 17 (1889) for original description, and *Pittonia* 3(14B): 56 for revised nomenclature (1896).
