PLANT DETAIL
Classification
Scientific Name  Ceanothus foliosus Parry var. viejasensis D. O. Burge & Rebman
Common Name  Viejas Mountain ceanothus
Family  Rhamnaceae
Element Code Name  PDRHA040D7
USDA Plants Symbol  None
Synonyms/Other Names  None

Conservation Status
FESA  None
CESA  None
Global Rank  G3T1
State Rank  S1
California Rare Plant Rank  1B.2
Other Status  None
CRPR Changes  added to 1B.2 on 2019-01-30
Date Added  1/30/2019
Last Change  5/26/2021

Ecology and Life History
Lifeform  perennial shrub
Blooming Period  Mar-Jun
Elevation: m (ft)  785-1370 (2575-4495)
General Habitat  Chaparral (gabbroic)
General MicroHabitat  None
Micro Habitat  None
Definitions of codes preceding a county and/or quad:
* Presumed extirpated
(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

**Notes**
Distinct from other *C. foliosus* vars. in leaf vestiture, with abundant hairs on abaxial leaf surfaces and young stems that often form a dense mat, obscuring tertiary venation (vs. glabrous or usually sparse abaxial hairs when present in other vars.). Similar to *C. tomentosus*; differentiated by undulate leaves with lamina that are often folded lengthwise (vs. plane margins with lamina that are flat in *C. tomentosus*). See *Systemic Botany* 42(3):529-542 (2017) for original description.
