Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

## **Notes**

Move to List 1B? Plants from SHA and THE Co. may be different taxon; needs study. Occurrence on 608C needs confirmation. Threatened on private lands by logging and development. Other threats include vehicles, road maintenance, recreational activities, alteration of fire regimes, erosion, non-native plants and overshadowing. See *Leaflets of Western Botany* 1:55 (1933) for original description as *F. phaeantha*, and *Madroño* 25(2):93-100 (1978) for revised nomenclature.
