

Considered But Rejected: *Bergia texana*

Aaron E. Sims
February 27, 2017

Background

Proposed for addition on 2/23/2017 due to reported less than 50 occurrences in CA. Sources say otherwise. 195 specimens in CCH, estimated 80 non-dups in Jepson eFlora. Jepson eFlora includes GV and south coast, but yellow flags are popping up in PR, WTR, SCoRO, n SNH, NCoRO, and MP. Furthermore, eFlora notes “disturbed soils” and “evidently spreading to reservoirs near enough to be considered ScV.” Demonstrably common and widespread, arguably has weedy tendencies.

Inventory Record

Bergia texana
CBR: Too common.
