

*Menodora scabra* var. *glabrescens* – Considered But Rejected on 31 October 2016

Aaron E. Sims, CNPS Rare Plant Botanist

*Menodora scabra* var. *glabrescens* was proposed for addition by John Kartesz (BONAP) on September 7, 2016. In correspondence with Jim Andre during the review of *M. scabra* var. *scabra* in late 2015, Andre said this taxon includes *M. scoparia* (treated as such in Jepson eFlora), which is a common taxon and is therefore too common for inclusion in the Inventory.
