

**Non-Substantive Name Changes in the CNPS Inventory  
to Reflect *The Jepson Manual, Second Edition*  
Aaron Sims (CNPS) and Roxanne Bittman (CNDDDB)  
April 24, 2012**

The following list of 59 taxa included in the CNPS *Inventory* and CNDDDB are to undergo name changes based on new treatments of *The Jepson Manual, Second Edition*. The list has been narrowed down from the many taxa with currently proposed name changes to only include those that are non-substantive, meaning the concept of the plant's identity did not change, just the name. Their previous name in the *Inventory* will be treated as a taxonomic synonym, and their status is not to be affected. Any name change based on *The Jepson Manual, Second Edition* treatments that results in a change in conservation status will go through a full status review.
