

***Narthecium californicum* – Considered But Rejected on December 7, 2016**

Proposed for addition to list 4 by Dean Taylor September 9, 2009. Backlog review by Julie Nelson on December 6, 2016: “I think this is way too common to make it to list 4.”

Currently has 27 records in Calflora and 188 specimens in CCH; approx. 58 non-dups (though at time of writing, the “n” number in the CCH collections by month section are off, J. Alexander pers. comm.). Jepson eFlora bioregions: KR, NCoRO, CaRH, n&c SNH.

CBR: Too common
