

***Pinus albicaulis* – Considered But Rejected on December 7, 2016**

Proposed for addition in 2010 based on USFWS petition for FT/FE status. Doesn't meet list 4 criteria.

Julie Nelson, December 6, 2016: "I know as an ESA candidate it seems like it should be at least a list 4, but it doesn't really meet the definition of limited distribution or infrequent throughout a broader area in California"

CBR: Too common.
