Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Threatened by development and non-native plants. Seriously attacked by the five-spined ips bark beetle at Torrey Pines SR, but biological control apparently has contained this infestation. See *American Forests* 91(10):26-29 (1985) for species account, and *Systematic Botany* 11(1):39-50 (1986) for taxonomic treatment.
