Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Possibly threatened by grazing, trampling, road maintenance, and non-native plants. Intermediates to ssp. *confertiflorum* are common, especially on Modoc Plateau to OR. Difficult to distinguish pure stands of ssp. *esotericum* in CA; needs further study. Only occurrences that mostly contain *P. p.* ssp. *esotericum* are included. See *Rhodora* 40(476):310-312 (1938) for original description, and *Madroño* 31(4):251 (1984) for revised nomenclature.
