* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Move to List 1B? Taxonomic questions remain, since plant co-occurs with nominate variety. A synonym of *A. lemmonii*

in *The Jepson Manual*, but author now believes it is distinct. Threatened by grazing. See *Leaflets of Western Botany* 7(9):220 (1955) for original description, *Madroño* 31(1):48-56 (1984) for alternate taxonomic treatment, and *Phytologia* 74(1):1-25 (1993) for revised nomenclature.
