Notes

Definitions of codes preceding a county and/or quad:

* Presumed extirpated

(*) Possibly extirpated

Species may be present in other areas where conditions are favorable. These data should NOT be substituted for pre-project review or for on-site surveys.

Notes

Widely scattered, but most occurrences small. Not seen recently in SCL or SMT counties. Threatened by logging and horticultural collecting. Monitoring needed for protected populations on USFS lands to assess reproduction, which may be inadequate. Threatened in ID, candidate for state listing in OR, and state-listed as Threatened in WA. See *Proceedings of the American Academy of Arts and Sciences* 17:380 (1882) for original description, *Lindleyana* 2(1):553-57 (1987) for distributional information, and *Fremontia* 17(2):17-19 (1989) and *The Wild Orchids of California*, p. 65-68 (1995) by R.
